

To Whom It May Concern,

It is my absolute pleasure to write this letter of recommendation for Alberto Hernandez, who served as an intern on our Software Engineering Development team for just over three months. In this short time, Alberto demonstrated qualities that set him apart as a remarkable individual with exceptional potential in the field of software engineering.

From the outset of his internship, Alberto approached his work with a hunger to learn and a drive to excel. The first month of his time with us was dedicated to intensive training, during which he completed over 25 hours of learning paths on Pluralsight. These courses covered a wide range of topics, including Web APIs, Postman, Power Platform, Power Automate, Power Apps, SQL, and Copilot AI. His ability to absorb and apply this new knowledge was nothing short of impressive.

Alberto quickly transitioned from learning to delivering impactful results. His primary assignment involved creating a Power Platform application that integrated Power Apps, Power Automate, and Dataverse tables to consolidate two of our existing applications into a single, scalable design. Not only did he accomplish this, but he did so with remarkable quality. He thoroughly tested and documented the solution, ensuring it was robust, resilient, and easy to maintain. This solution will continue to provide value to our team long after his internship.

What stood out most about Alberto was not just his technical acumen but also his professionalism and soft skills. He consistently demonstrated pride and dedication to the quality of his work, presenting his ideas and solutions with confidence and clarity. His ability to articulate complex technical concepts and collaborate effectively with the team showed a maturity beyond his years.

Moreover, Alberto's positive attitude and "can-do" spirit made him a joy to work with. He tackled every challenge with enthusiasm and maintained a collaborative mindset throughout. It's rare to find someone who combines technical aptitude with a willingness and ability to learn something entirely new—and excel at it—in such a short period.

I am confident that Alberto is destined for greatness in his career. He has shown the potential of a seasoned software developer and the drive to continue growing as a professional engineer. I wholeheartedly recommend him for any opportunity he chooses to pursue and would welcome the chance to work with him again in the future.

If you have any questions or would like further insights into Alberto's work with our team, please don't hesitate to reach out.

Sincerely,

Jorge Aguilar

Manager, Software Engineering @ UKG
