EDUCATION

Bachelor's in Computer Science

Florida International University

Expected: Dec. 2025

Miami, FL

EXPERIENCE

Software Engineering Intern

Feam Aero

Sep. 2025 – Dec. 2025

Miami Springs, FL

- Maintained **Athena**, an aviation reporting platform, using **C#**, **TypeScript**, **SQL**, and **Azure** to improve performance and data reliability.
- Developed **Nimbus**, an aviation maintenance **AI platform**, leveraging **React**, **SQL**, and **Azure** for scalable front end and predictive features.
- Worked under an **Agile workflow** to deliver solutions with **cloud integration**, **database optimization**, and **software best practices**.

Software Engineering Intern

UKG

Sep. 2024 – Dec. 2024

Weston, FL

- **Reported to Project Manager**, Financial IT Software Development Team. Focused on **AI-enhanced tooling** for internal finance operations. Built an **automated system using Power Platform**. Authored **technical design documents**.
- Responsible for **end-to-end delivery** of a customer data management program in **Dynamics 365** using **C#**, **ASP.NET MVC**, and **Microsoft SQL** which **greatly reduced manual workflows**.
- Integrated **Microsoft Copilot** to **automate reporting logic** and **streamline cross-team data flows**.

System/Network Analyst

Mercedes-Benz

Aug. 2023 – Sep. 2024

Coral Gables, FL

- **Worked alongside the System Administrator**. Focused on **automation**, **system security**, and **infrastructure reliability**. Supported **enterprise tooling** and endpoints.
- **Scripted deployment workflows** using **PowerShell** and managed enterprise systems in **Office 365**, **Azure**, and **Active Directory**.
- Built **custom tools** for **policy enforcement and monitoring**, **reducing IT ticket volume** and **boosting system responsiveness**.

PROJECTS

Study Den | Expo Go, NativeWind, Typescript, Sqlite, Fast API, Pytesseract, Linux

Apr. 2025 – May 2025

- Developed a responsive **React Native** frontend with **Expo Go**, **NativeWind**, and **TypeScript**, allowing for smooth navigation of a dynamic **library page** that fetches **user-specific scanned books** via a **FastAPI** backend.
- Resolved critical **frontend bugs** to enhance **user experience**, ensuring reliable performance across different devices and seamless integration with **SQLite** and **OpenAI API** features.
- Deployed a **Linux Ubuntu** environment to host the **live database** and backend dependencies, integrating **Pytesseract** for **OCR capabilities** and optimizing **server stability**.

TLDR | Javascript, Python, HTML, Node js, Git/Github, OpenAI, Transformers

Mar. 2025

- Built a **browser extension** to **scrape and summarize** news articles using **NLP models**.
- Combined **Cheerio.js** with a **Flask backend** powered by **HuggingFace's BART** model and **PyTorch**.
- Integrated front-end with **Bulma CSS** and backend via **Webpack** and **Node.js** for **real-time summaries**.

Financio | Javascript, React, MySql, Git/Github, DevOps, MS Copilot Studio, UI

Sep. 2024

- **2nd Place winner in the FIU ShellHacks 2024 Vanguard Category**. Worked in a 4-person team to create a **financial assistant web app** using **Microsoft Copilot Studio**.
- Built a **mobile-first React app** with **custom AI logic** and integrated **MySQL** for persistent data.
- Developed an **educational quiz engine** offering **personalized recommendations** based on user answers.

TECHNICAL SKILLS

Languages: C/C++, C#, Java, Python, Javascript, TypeScript, SQL

Frameworks: .Net, ASP.Net MVC, React, React Native, Expo Go

Developer Tools: Git/Github, Node.js, VS Code, Visual Studio, FastAPI, DevOps, Azure, SharePoint, Microsoft SQL Server, Postman, Linux

Libraries: Pandas, NumPy, Matplotlib, PyTorch, Transformers, Flask, Cheerio, Unity, Tailwind, Native Wind
